

Ayush Shah

Frontend Engineer | Associate Manager

+91 9049877048 | developerr.ayush@gmail.com | developer-ayush.com | linkedin.com/developerr-ayush | github.com/developerr-ayush

PROFILE

Frontend engineer with 5 years building React and Next.js applications for sports platforms reaching 10M+ users, including WPL, ISL, and Gujarat Titans. Led delivery on 7 major projects end-to-end, shipped 50+ production applications, and built a secure authentication system supporting 51,000+ users. Cut development cycle time by 60% by integrating AI-assisted workflows into the team's process, while optimizing 40+ pages to 90+ WCAG accessibility scores. Comfortable extending across the stack — working in Fastify and PostgreSQL on Fanos Surface's backend and building self-owned full-stack projects (Prisma, MongoDB, PostgreSQL) end-to-end. Looking to take on a Lead Frontend Engineer role with broader ownership of architecture and mentorship.

KEY SKILLS

Languages: JavaScript (ES6+), TypeScript, Node.js

Frontend: React.js, Next.js, Nuxt, Tailwind CSS, GSAP, Framer Motion

State & Testing: Zustand, React Query (TanStack Query), Jest (end-to-end functional testing)

Backend & Data: Express.js, Fastify, REST APIs, MongoDB, PostgreSQL, Prisma, AWS

Tools: Git, Figma, Postman, VS Code, GitHub Copilot, Cursor AI

Focus Areas: Performance optimization, accessibility (WCAG), full-stack ownership, scalable API integration, team mentorship

EXPERIENCE

Frontend Engineer, Associate Manager — Sportz Interactive

Nov 2022 – Present | Mumbai, India

- Led 7 major projects from concept to launch for clients including WPL, ISL, and Gujarat Titans, owning delivery timelines and client communication with zero missed launches.
- Built and shipped 50+ production web applications (100+ features total) in React, Next.js, and Nuxt for platforms serving 10M+ users, cutting page load time by 40%.
- Optimized 40+ pages/apps to 90+ WCAG accessibility scores, with select high-traffic pages reaching 100% Lighthouse accessibility.
- Designed and implemented a secure authentication system supporting 51,000+ users, handling session management and data integrity at scale.
- Introduced AI-assisted development workflows (Copilot, Cursor) across the team, reducing development cycle time by 60%.
- Partnered with designers and backend engineers in an agile process to ship 15+ features on schedule, driving a 20% increase in user engagement.
- Mentor a team of 5 developers, from junior to senior, on code quality, React best practices, and architecture decisions.
- Own architecture and delivery across Fanos Surface — a server-driven UI product with 200+ granular features and 20+ major feature sets, spanning Admin, Renderer, Backend, CMS, and OIDC layers, letting apps and web ship new screens without app-store releases.
- Built Fanos Surface's frontend in TypeScript with Zustand and React Query for state and data-fetching, backed by Jest end-to-end functional test coverage.
- Contributed to Fanos Surface's backend layer using Fastify and PostgreSQL, with AWS involvement in deployment and infrastructure.

Frontend Developer — Dataviv Technologies

Jul 2021 – Oct 2022 | Mumbai, India

- Built 20+ client-facing web applications with secure API integrations, ensuring cross-device compatibility and maintainable codebases.
- Designed a real-time analytics dashboard using Chart.js, connecting it to backend services for live data visualization.
- Worked with backend engineers on 50+ projects, reducing API latency and improving SEO and accessibility across client platforms.

PROJECTS

- **Personal Portfolio Site** (*Next.js, MongoDB, Prisma*) — Designed and built full-stack end-to-end, including schema design and API layer.
- **Issue Tracker** (*Prisma, PostgreSQL*) — Self-built full-stack tool covering data modeling, API design, and UI.
- **Southern Brave** (*React, Next.js, OIDC*) — Delivered frontend and integration end-to-end, including OIDC-based login.
- **Admin Panel CMS** (*Next.js, Prisma, AWS, Auth.js*) — Content management system with AI-powered writing tools, secure authentication, and image storage.
- **School VR Platform** (*React, Custom Backend*) — Interactive VR-style education platform with custom auth and session backend.
- **TradeBattle / Cricket Snake & Ladder** (*React, GSAP*) — Performance-optimized game animations; 2nd place hackathon win for custom board-traversal algorithm design.

EDUCATION

BCA — Amity University (Distance Learning)

2023 – 2025

CGPA: 7.0 | Focus: Programming, Data Structures, Algorithms, Web Technologies

CERTIFICATIONS

- **JavaScript Mastery (2021)** — Applied advanced JavaScript and algorithmic logic across 15+ projects.
- **Full Stack Web Development, Apna College (2022)** — Built 20+ projects including algorithm-based games (Simon Says, Spotify clone).
